

ROUND 3 INTERVIEW
May 11, 2019

BERNHARD LANGER (-12)

Q. Chasing down the lead today. This would be your third win at Regions Tradition. What was clicking for you this afternoon or this morning?

BERNHARD LANGER: Yeah, I played very solid just all around, and it's just a matter of making a few putts or not. Had it going, 5 under after whatever, 13 or so. Then missed a couple of opportunities and made a really bad bogey. I mean, there's good bogeys and bad bogeys, and 15 was horrible after a good tee shot, bad layup and then downhill from that point onwards.

Q. How were conditions today?

BERNHARD LANGER: They were good, conditions were actually very nice. It drizzled a little bit this morning, but now we've got sunshine. The wind kicked up a little bit, which made it tricky coming in, but otherwise it was very pleasant.

Q. And is weather on your mind for tomorrow at all?

BERNHARD LANGER: Well, whatever comes, we've got to deal with it. Hopefully not much comes even though the forecast might say otherwise. We're hoping for the same break we had the last two or three days, that the mornings are good, and the heat might build up with the storms later in the day. Hopefully we'll be done by then.

Q. How does a round like today kind of give you confidence moving into tomorrow?

BERNHARD LANGER: Well, I love this golf course and I've been playing solid golf even last week. Last week I didn't make many putts, I finished 15th or whatever. This is a golf course where I've done well on, I know how to play it and it's just a matter of executing and then hopefully rolling in a few putts. The greens are beautiful, so there's no excuse. It's just a matter of hitting the right putt on the right line.

Q. You have to know your name is near the top at Greystone. What is it about this golf course that you like that often goes well?

BERNHARD LANGER: It's a really good golf course. It's very demanding, and usually the wind blows. This year it's a little wet, but that's the way the season has been. I just like the challenge it represents. There's some very hard holes and then there's some easier holes, and you've got to take care of the hard ones and take advantage of the easier ones.
