

**East Lake Cup Women – Match Play**  
**October 28, 2025**

**MEGAN MENG**  
**Northwestern**

---

**Q. First off, what's it like being able to get the second point for Northwestern and put your team in this position?**

**MEGAN MENG:** I'm really happy, and I'm also just really proud that my team's already got one point on the board. I didn't play the best yesterday during the nine hole stroke play, so I'm just happy that I could have kind of redeemed myself today going out and putting up a good round regardless of who I beat. Just like being able to play good golf was something I'm really excited about.

**Q. And going off of that, what did you learn from yesterday that you were able to take into today?**

**MEGAN MENG:** Really prioritizing the speed of my putts, I think, and just being able to tell myself to choose the safe shot and not be so aggressive with all these pins, especially with the tough quick conditions of the greens.

**Q. And after yesterday playing just nine holes and then today to 17, how did you change your mindset coming in and playing match play today?**

**MEGAN MENG:** Kind of just having patience with myself in just the round, knowing that I have a lot of holes ahead of me and not getting too up or down any which way.

**Q. And this is obviously such a high level tournament and this is such a well-known, historic golf course, so what's it like for you being able to play here in this tournament?**

**MEGAN MENG:** I think it's so awesome. It's so cool that I can say I played the same course that the FedExCup Championship is at. Like even if I wasn't like a big golf course guru, I feel like that's something so cool and like anybody could like honestly think about or know about or like relate to. So it's really cool, I'm really happy to be here.

**Q. And what did you learn from your match today that you are going to be able to take with you into match play tomorrow?**

**MEGAN MENG:** Kind of doing more of the same knowing that I have the game and that I just need to keep doing what I've been doing.
